

Handex Extra Care

Handwash and disinfectant

Description

Handex Extra Care is a handwashing product with excellent bactericidal properties. The product does not contain perfume, making it also suitable for application in the food service area.

Key properties

Handex Extra Care is based on a mild surfactant system, bactericidal agent, thickener polymer and humectants. The amphoteric, polyglucoside, nonionic based mild surfactant system ensures excellent removal of (greasy) soil. These ingredients are mild on the skin and therefore this product can be applied in areas where frequent handwashing is required.

The product has been formulated with chlorhexidine digluconate, a good all-round bactericidal agent. This ingredient remains active against bacteria, even after rinsing and drying of the hands. In medical practice chlorhexidine based formulations are widely used as general disinfectants.

Handex Extra Care does not contain perfume, eliminating the risk of tainting foods and making it suitable for use in the food service area.

Handex Extra Care has been approved by Unilever's Safety and Environmental Assurance Centre (SEAC) as safe for use when handled in accordance with the directions for use.

Benefits

- Contains Chlorhexidine digluconate, a highly effective bactericidal agent
- Is mild on hands; can be used for frequent handwashing
- Excellent cleaning performance
- Perfume and dye free (suitable for food service area)

Use instructions

Apply one or two dosages of product on hands. Wash hands with lukewarm water. Rinse and dry thoroughly.

Dry hands are important with respect to good hygiene.

Technical data

Appearance:	Light yellowish opalescent liquid
Relative Density [20 °C]:	1.005
Viscosity [mPa.s; 25 °C]:	350
pH [neat]:	5.25

The above data is typical of normal production and should not be taken as a specification.

Handex Extra Care

Safe handling and storage information

Store product away from extremes of temperature (temperature > - 5 °C and < 40 °C).

Please make sure that the dispensers are thoroughly cleaned prior to switching to this product. Some contaminants may reduce the efficacy of chlorhexidine.

Do not wash fabric stained with Handex Extra Care with chlorine based bleach; this will result in dark red chlorhexidine stains. Please use perborate or percarbonate based bleach systems instead.

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.

MAF Approval

MAF Approved C 51 (Fish Game Meat)
