BACTOSOL

The professional choice for your Bar & Cellar

Bactosol Beerline Cleaner

- Effective cleaning and disinfection
- Non-tainting formulation
- Easy to use

Effective cleaning and disinfection

Bactosol Beerline Cleaner is a powerful chlorinated detergent formulated for the cleaning and disinfection of beer lines and dispensing equipment in one operation. It prevents the development of micro-organisms and yeast which could present a food safety hazard.

Non-tainting formulation

Bactosol Beerline Cleaner is specifically designed to clean and sanitise without affecting the taste or smell of beer. It has no effect on beerhead retention ensuring the beer remains attractive to consumers.

Bactosol Beerline Cleaner

Easy to use

Bactosol Beerline Cleaner works in all water conditions and is effective on a wide range of soils. Its upper dilution rate makes it cost competitive whilst its low-foaming properties make it easier to rinse and improve operational efficiency.

The professional choice for your Bar & Cellar

Bactosol Beerline Cleaner is effective at both cleaning and sanitising all types of beer dispensing equipment including beer lines, tanks and taps.

Usage instructions

- Rinse out equipment with clean water.
- Prepare a Bactosol Beerline Cleaner solution, diluting 2x28ml pelican pumps in 10 litres of cold water for normal soilage or 4x28ml pelican pumps in 10 litres of warm water for heavy soilage.
- Draw the solution through the system until full and allow to soak for 30 minutes.
- Rinse thoroughly with clean cold water

Top tips

- Beerlines must be cleaned at least weekly with Bactosol Beerline Cleaner.
- Use cold water for normal soilage and warm water for heavy soilage.
- Rinsing with plenty of water is essential.
- Use gloves, face and eye protection.
- Beer is officially classified as food. Apply same standards of hygiene to cellars as to kitchens.

Pack details

Product code: 415720
Pack size: 5 litres
Packs per case: 2x5L
Cases per pallet: 60
Cases per layer: 20

Outer Barcode: 8711800415728

Technical information

Appearance: Clear yellow liquid
PH: >12
Density: 1.18 g/cm³
