

BACTOSOL

BACTOSOL

The professional choice for your Bar & Cellar

Bactosol Hand Glasswash Detergent

- Powerful detergent
- Non-tainting bactericide
- Easy to use

Powerful detergent

Bactosol Hand Glasswash Detergent contains a powerful blend of surfactants for the effective removal of stubborn stains, including lipstick, fruit juice and stout. Its concentrated formula offers efficient and rapid cleaning.

Non-tainting bactericide

Bactosol Hand Glasswash Detergent's formulation includes a non-tainting bactericide, which enhances hygienic cleaning at handwashing temperatures while preventing build-up of residues likely to affect the taste or smell of drinks.

Bactosol Hand Glasswash Detergent

Easy to use

Bactosol Hand Glasswash Detergent is suitable for use in all water conditions. Its special low foam formulation avoids excess foaming. Easy to rinse, Bactosol Hand Glasswash Detergent is especially suited to the needs of the professional and ensures perfect results.

The professional choice for your Bar & Cellar

Bactosol Hand Glasswash Detergent is specially designed to provide sparkling results on all glassware with minimal effort.

Usage instructions

- If prolonged contact is necessary, protect hands with suitable gloves.
- Dilute 30 mls (1 push of a 30 ml pelican pump or 1/3 cup) to 10 litres of hot water in a sink.
- Wash glasses in solution.
- Drain and allow to air dry.

Top tips

- Ideally use two sinks for best results.
- First use hand hot water and Bactosol Hand Glasswash Detergent followed by a rinse in clean hot water to remove thoroughly.
- Glass cloths may be a source of bacteria and are not recommended. If polishing is required use disposable paper towel.

Pack details

Product Code: J043530
Pack size: 5 litres
Packs per case: 2x5L
Cases per pallet: 60
Cases per layer: 20

Outer Barcode: 5000204043532
Inner Barcode: 5000204895629

Product Code: J043520
Pack size: 1 litre
Packs per case: 12x1L
Cases per pallet: 45
Cases per layer: 15

Outer Barcode: 5000204043525
Inner Barcode: 5000204895636

Technical information

Appearance: Clear pale yellow liquid
PH: 6-8
Density: 1.01 g/cm³
