

## The Intelligent Solution for the Small Professional Dishwasher

DIFY is the ultimate solution for multi-cycle, front loading dishwashers and glasswashers.

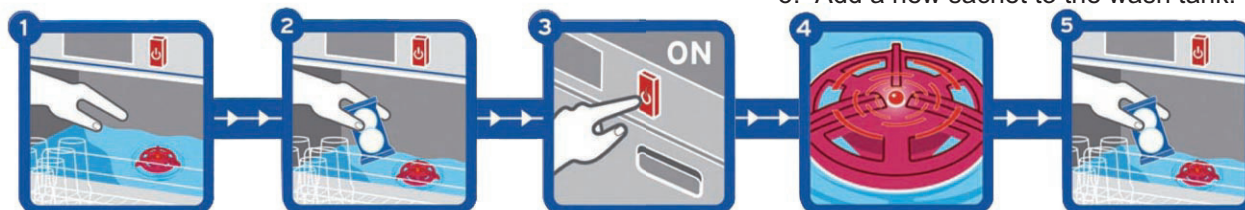

- Excellent cleaning performance
- Safe and easy to use
- Compact and cost-effective
- Environmentally friendly

### How does DIFY work...?

1. Place floating J-Watcher in wash tank.
2. Add 2-in-1, soluble sachet to the wash tank (no need to unwrap sachet).

3. Start the dishwasher. J-Watcher will flash green.
4. After about 15 washes the J-Watcher will flash red to indicate the need for a new sachet.
5. Add a new sachet to the wash tank.

## Let DIFY do the work for you

### Excellent Performance

Ensures that the optimum level of detergent and rinse-aid is present at all times, guaranteeing sparkling results from every wash.

### Easy to Use

DIFY minimises the need for training and keeps you in control, eliminating any need for dosing equipment and servicing. Just put one sachet into the wash tank and continue washing for up to 15 cycles. The J-Watcher flashes red when more product is required, removing the risk of overdosing or forgetting to dose.

### Cost effective

DIFY reduces waste and over spending. The soluble sachet and J-Watcher ensure that the optimum level of detergent and rinse-aid is present at all times, removing the risk of overdosing.

### Safe

Safe to handle, DIFY sachets dissolve in the dishwasher, preventing any contact with the chemical.

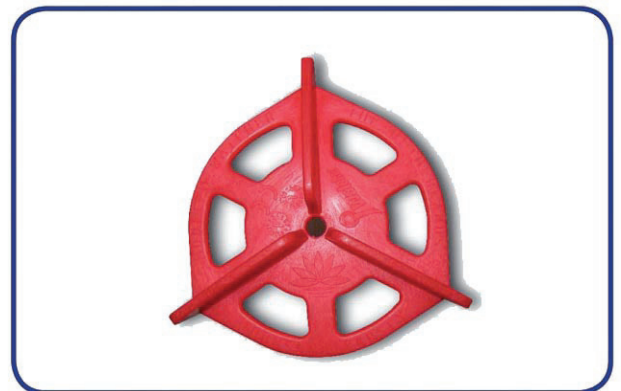

### Compact

The compact DIFY pack with 600 washes in every pack is the ultimate solution for areas with limited space, saving on packaging and taking up almost no space in your kitchen. As well as reducing the need for bulky dosing equipment, the 2-in-1 sachets, suitable for both dishwashers and glasswashers, reduce the number of products required.

### Environmentally friendly

DIFY has the AISE charter mark for sustainable cleaning. None of the plastic used in DIFY sachets goes to landfill.
