ProSpeed^{TM/MC} is the productivity and quality leader for small space application

A system approach

At last there is a system approach to applying floor finish in small spaces that combines packaging, applicator and the best finishes on the market. It is extremely easy to master. ProSpeed^{TM/MC} helps novice employees quickly become floor finish experts, and is available in a variety of finishes.

No waste, no spills

The average conventional mop head holds 1/3 gallon of finish, and 1/4 gallon is left in the bucket. The ProSpeed mop head holds 4–6 ounces. Application flow is uniform and consistent. Since the finish is self-contained at all times, the chance of spills is reduced significantly.

Time saver

ProSpeed^{TM/MC} applies finish **3X faster** than mop & bucket, and significantly reduces set-up time because everything comes ready-to-use. Simply hook up the components and begin applying finish. No pouring. No bucket. No mess. Everything that touches the finish is disposable, so when you're done clean-up is fast and easy.

Time/motion and physiological studies prove that ProSpeed™/MC and TrailBlazer™/MC deliver unmatched productivity with less effort

Why are they important?

Time/motion and EMG (Electromyography) studies are the best way to directly measure the muscular effort required. EMG studies are used to measure muscular exertion in real time while performing a task.

ProSpeed uses...

- 35% less **shoulder** effort
- 23% less **upper back** effort
- 40% less **lower back** effort
- ...than a mop and bucket

Trailblazer uses...

- 51% less **shoulder** effort
- 52% less **upper back** effort
- 70% less **lower back** effort
- ...than a mop and bucket

ProSpeed uses...

- 54% less **shoulder** effort
- 40% less **upper back** effort
- 49% less **lower back** effort
- ...than a flat mop

Trailblazer uses...

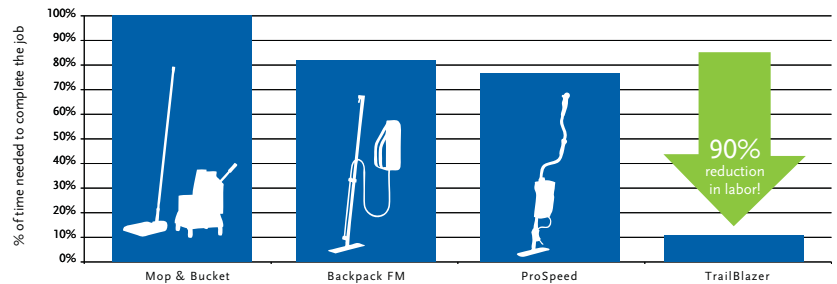

- 65% less **shoulder** effort
- 62% less **upper back** effort
- 76% less **lower back** effort
- ...than a flat mop

The right tool regardless of space

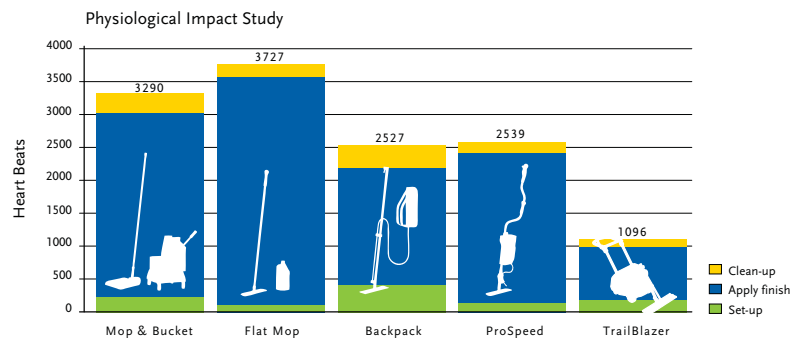

Whether used separately or together, ProSpeed and TrailBlazer deliver:

- **Faster application**
- **Less user fatigue**
- **Less chemical and water waste**
- **Better results**

Increased Productivity†

Less Effort — Total Heart Beats = Total Effort*

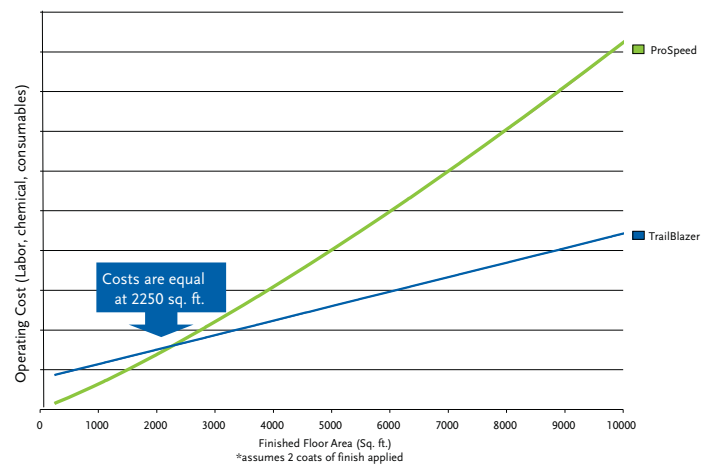

Both systems greatly reduce waste†

(Measured in Gallons)	Mop & Bucket	Backpack FM	TrailBlazer	ProSpeed
Chemical Waste	17.4	8.4	3.24	0.9
Water Waste	142.5	102.0	69.6	0.0

* Disposable pad used with ProSpeed and launderable pad used with TrailBlazer

Choose the right product for the right job

- 25,000 sq. ft. facility
- † - 2,500 sq. ft. per application with 3 coats of finish
- 3 recoat cycles per year
- * 2,500 sq. ft.

TrailBlazer^{™/MC}

*is the productivity and quality leader
for large space applications*

Increase productivity

TrailBlazer^{™/MC} applies finish **9X faster** than mop & bucket, **over 20,000 sq. ft./hour!** Set-up and clean-up times are minimal, so TrailBlazer^{™/MC} allows you to spend time on the job, not prep and clean-up. Anyone can apply a perfect coat of finish as fast as they can walk.

Decrease chemical waste and odor

TrailBlazer^{™/MC} significantly reduces the amount of finish and water that is wasted by applying the finish directly to the floor from any of JohnsonDiversey's 5 gallon BIBs. So you never need to fill a bucket again, which means no more odor from open buckets and no buckets to rinse when the job is complete.

Increase quality

TrailBlazer^{™/MC} is easy to use and delivers consistent high-quality results—all with minimal training for personnel. With the specialized pump, the thickness of application remains constant regardless of the walking speed, giving you a flawless finish everytime.

*Big Job or Small Job —
It's Now an Easy,
Time-Saving,
Economical Job*

ProSpeed^{TM/MC}

- Up to 3X faster than mop & bucket
- Covers at a rate of 130 sq. ft. per minute
- Ideal for small areas — 2,000 sq. ft. or less
- Minimal set-up and clean-up time
- Greatly reduces finish waste
- Dramatically reduces physiological impact on user
- Consistent, high-quality results
- Works with a variety of JohnsonDiversey finishes

TrailBlazer^{TM/MC}

- Up to 9X faster than mop & bucket
- Covers at a rate of 300 sq. ft. or more per minute
- Ideal for larger areas — 2,000 sq. ft. or more
- Minimal set-up and clean-up time
- Greatly reduces finish waste
- Dramatically reduces physiological impact on user
- Consistent, high-quality results regardless of walking speed
- Works with all JohnsonDiversey finishes
- Apply finish as fast as you can walk
