USE SPECIFICATIONS

NO. OF COATS	DILUTION	DWELL TIME	TYPE OF AGITATION
1-5	1:12-1:18	5-10 MIN.	PAD
6-10	1:9-1:12	10 MIN.	PAD/BRUSH
11+	1:6	10+ MIN.	BRUSH

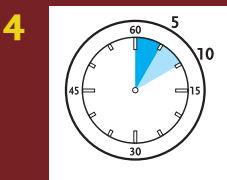

1 Use appropriate personal protective equipment. Dilute FASTRIP™ floor stripper according to the chart above.

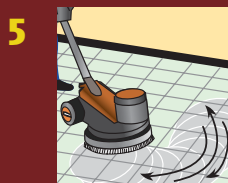

2 Blockade areas to be stripped. Floors will be very slippery until dry. Use Zorba™ Absorbent Control Pad to help contain solution within area being stripped.

3 Apply a liberal amount of solution uniformly to floor with a mop. Start with the edges to give them more soak time. If splashing occurs, wipe off surfaces with a clean rag dampened with water.

4 Let solution dwell according to the chart above.
NOTE: Do not allow solution to dry on floor. Add more solution as needed.

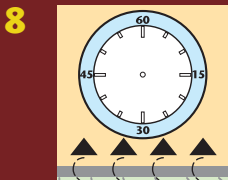

5 Machine or hand scrub thoroughly using appropriate stripping pad or brush. While scrubbing floors with 11+ coats of finish, it may be necessary to apply water to aid with pickup of stripper/finish solution.

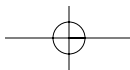

6 Pick up all of the stripper/finish solution with a damp mop, wet vac or autoscrubber. When dealing with extreme build up (11+coats), repeat process as necessary.

7 Rinse floor with clean water to remove any residue not picked up by wet vac or auto scrubber.

8 Let floor dry completely before applying recommended Johnson Wax Professional brand sealer or finish.

INTRODUCING FASTRIP™/MC

Johnson wax
PROFESSIONAL

**The power to
break through finish fast.**

FASTRIP™/MC

Pure power. Fast results.

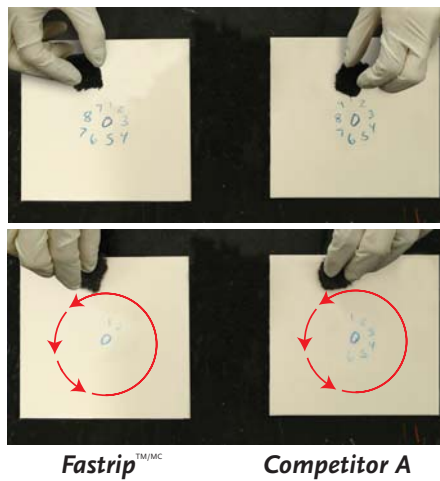

Finally: a floor stripper with the power to rem

Breakthrough Features:

- **Delivers pure power performance**, even on heavy build-up.
- **Provides fast, consistent results** and significantly reduces the chance of costly “do-overs.”
- **Delivers a wide range of dilutions** - pick the dilution that matches your stripping challenges.
- **Low odor formula** - provides low odor to meet the needs of health care and other 24/7 facilities.
- **Versatile formula** that breaks down foam quickly for use in an autoscrubber.

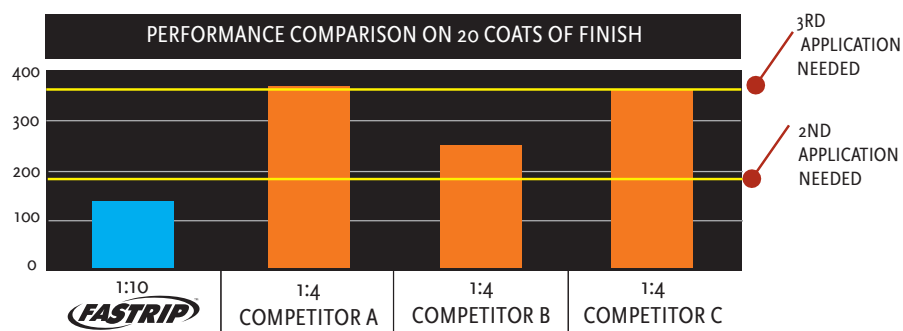

Passes the “Clock Test”.

We applied and baked 9 coats of finish on vinyl composition tile. Each new coat was numbered in the format of a clock. Both Fastrip™^{MC} stripper and Competitor A formulas were applied to the finish and scrubbed 3 times, counterclockwise. After one minute the difference was clear: Fastrip™^{MC} stripper removed 7 coats of finish and Competitor A removed only 3 coats of finish. **Now that says “power!”**

Convincing Lab Results.

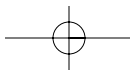

We measured the number of scrub cycles needed to completely strip 20 coats of finish. When measuring Fastrip™^{MC} vs. various competitors, there's no contest.

Yellow lines indicate approximately where a new strip cycle would take place.

Pure power. Fast results.

Clean is just the beginning

Technical Breakthrough.

We did some real-world testing on a floor with an accumulation of more than 50 coats of tough finish and put Fastrip™^{M/C} stripper to the test.

The results- **Fastrip™^{M/C}** stripper completely stripped the floor **50% faster** than the competitor's "high performance" stripper!!

The reviews are in...

"With Fastrip, we were able to remove 15-20 coats of floor finish in only one application. This was 30% faster than our current stripper! I was even impressed with the low odor, which is particularly important in our facility."

- Long-Term Care Facility, Washington D.C.

"Fastrip floor stripper is some of the most powerful stuff we've seen. It took off 12 coats of floor finish in only one pass and we estimated a 50% time savings versus our current stripper. When a product saves that much time, it's clearly a winner."

- Service Contractor, Cedar Rapids, IA

"Anything that helps us save time & money is of interest to us. Fastrip helped us save time & money. What typically takes two passes to strip, took only one pass. I also noticed the odor was very low. I see a lot of value in Fastrip."

- International Airport, Florida

Tear along perforation to remove wall chart. Remove adhesive backing and affix to wall.

Fastrip™^{M/C} "No-Hassle" Guarantee

To encourage you to try our product, if you use Fastrip™^{M/C} product in accordance with the label directions and are not completely satisfied with its performance, your entire purchase price of the Fastrip™^{M/C} product will be refunded. Any unopened containers will be picked up by our authorized source that sold you the product.

To obtain a refund, simply send a copy of your purchase receipt along with reason for your dissatisfaction to the:
