

Wettex Sponge Cloth

Helping to Clean up the World

Wettex Sponge Cloth is manufactured from a special blend of cotton, cellulose and salt. The cellulose provides excellent absorbency whilst the salt is dissolved and rinsed away in the manufacturing process, leaving pores or hollows which improve the high level of absorbency even further. The cotton fibers link the cellulose from edge to edge and top to bottom. This is the unique process patented by Wettex, the first producers of cellulose sponge cloth. Imitators strengthen the cloth with a net of fabric only through the centre giving poor abrasion resistance in normal use.

Features and Benefits

- Wettex is highly absorbant and can absorb up to 11 times its own weight , thus it deals efficiently with large spills around the home or business.
- Wettex can be machine washed, washed by hand or boiled. It can also be washed in a weak bleach solution, making it an easy cloth to clean and extremely long lasting.
- Wettex is soft and supple making it easy to reach difficult corners.
- Wettex' absorbancy means it doesn't leave streak marks after wiping surfaces.
- Because Wettex dries fast, it doesn't smell and is sanitary.
- Wettex is extremely versatile and can be used on numerous surfaces around the home and business including countertops, kitchen sinks, dishwashing, stoves/ovens, kitchen tables, furniture, tubs, walls, windows, pots and pans, cars, floors and anywhere wiping up is required.
- Wettex is kind to the environment as it is made from natural and renewable resources.
- Wettex is available in two convenient pack sizes:
12x2.5metre rolls; and,
1x15 metre roll.

The 2.5 metre rolls can be sold individually and cut to the desired length by the consumer. This is suitable for use around the home.

The 15 metre roll comes in a dispensing pack so that the cloth can be cut to the desired length. This is suitable for business premises.

Wettex Products Available In:

•Wettex 2.5 metre Roll
