

Soft Care Alcoplus

Hand disinfectant

H500

Description

Soft Care Alcoplus is an alcohol rub for skin disinfection. The product does not contain perfume or dye, making it also suitable for application in the food processing area.

Key properties

Soft Care Alcoplus is a skin disinfectant based on isopropyl alcohol and skin care components. Isopropyl alcohol is a very efficient disinfecting agent and consequently highly effective against transient skin micro organisms. This product has also been formulated with a lanolin derivative, an excellent skin care ingredient. Therefore it can be applied in areas where frequent use of hand disinfecting products is required, such as hospitals.

Soft Care Alcoplus is perfume-free, thus eliminating the risk of tainting foods and making it suitable for application in the food processing area.

Soft Care Alcoplus has been formulated in accordance with the European Cosmetics Directive and as such is safe when applied according the directions for use.

Benefits

- Contains isopropyl alcohol, a very quick & effective disinfectant
- Quick action
- No need for water
- Suitable for surgical disinfection
- Perfume free (suitable for use in food processing area)
- Contains lanolin derivative– prevents skin irritation

Use instructions

Apply 3 ml of **Soft Care Alcoplus** to rub onto dry hands and massage thoroughly into the skin, paying particular attention to fingertips, the nails and webs of the finger. Use for at least 30 seconds.
