

Clax Oxy

Oxygen Bleach Powder

Description

Clax Oxy 4EP1 is a laundry destainer specially formulated for use in commercial, healthcare and on premise laundries. The product can be used for all types of fabric, except wool and nylon (polyamide), and should be applied in the main wash at temperatures between 70 and 90°C.

Key Properties

Clax Oxy 4EP1 is a well stabilised powder laundry destainer, based on percarbonate, alkaline salts and bleach stabilising agents. Dissolution of percarbonate will lead to formation of hydrogen peroxide. The bleach stabilising agent and use according to instructions for use will result in minimal fabric damage and colour fading.

Avoid contact of **Clax Oxy 4EP1** with bloodstains during the initial phase of the wash (first 7 minutes) as bloodstains will set when in contact with peroxide and become difficult to remove. Fabrics with bloodstains should be pre-treated with enzymatic product in the pre-wash.

Benefits

- Excellent destainer for all types of fabric, including coloureds.
- Results in minimal fabric damage when used according to user instructions

Instructions for Use

1. Dose manually.
2. Dose into main hot wash or following wash in a separate bleach bath following the hot wash. Optimal bleaching at temperature range 70-80°C, ensure pH 11 – 11.5. Maximum effectiveness >80°C, ensure pH 9-10.7

Soaking

1. Dissolve powder in hot water.
- Soak items for 10-30minutes depending on staining and soil level. For best performance ensure temperature of water is above 60°C.

Dosage recommendation:

Light soil	1-2g / kg dry goods
Medium soil	3-5g / kg dry goods
Heavy soil	5-6g / kg dry goods

Note: Do not use Clax Oxy 4EP1 on wool and nylon (polyamide: eg. HTN dustmats and microfibre).

Contact your JohnsonDiversey representative for procedures to optimise performance.

Technical Data

Appearance	White free flowing powder
pH 10% solution	12.0
