

JohnsonDiversey Oxivir Spray

Detergent Disinfectant, Oxygen Based

E2n

Description

Oxivir Spray is a ready-to-use liquid detergent disinfectant for the cleaning and disinfection of washable hard surfaces and washable fabrics.

Key properties

- **Oxivir Spray** is a ready-to-use liquid detergent disinfectant based on a patented technology known as Accelerated Hydrogen Peroxide (AHP), which increase Hydrogen Peroxide capabilities (efficacy and stability) giving improved disinfecting properties.
- Effective against a wide range of micro-organisms; Bactericidal, Virucidal, Fungicidal And Sporocidal.
- Effective cleaner – good soil removal, no streaking
- Efficiently hinders lime scale build-up.
- Not classified and safe on washable surfaces.

Benefits

- Simultaneously cleans and disinfects
- Non-corrosive & high disinfection - no damage to facility interior fittings
- Effective against a wide spectrum of micro-organisms
- Suitable for use in high risk infection areas e.g. public washrooms, healthcare environments
- Safe to use is not classified as hazardous under the Chemicals (Hazard Information Packaging & Supply) Regulations

Use instructions

Spray cleaning and disinfection:

1. Remove gross soiling
2. Spray onto a clean cloth
3. Apply the product with the cloth, and keep surfaces wet for at least 5 minutes, rinse thoroughly with clean water and allow to air dry.

Important:

Do not use warm water. Do not mix with other products. Do not use on water-sensitive surfaces. Do NOT use on acid sensitive surfaces such as marble

Technical data

Appearance:	clear, colourless liquid
Relative Density at 20°:	1.0
pH-value solution:	pH 1.0 – 2.0

The above data is typical of normal production and should not be taken as a specification

Safe handling and storage information

Full guidance on the handling and disposal of this product is provided in a separate Material Safety Data Sheet.
Store in original container. Avoid extremes of temperature.

JohnsonDiversey Oxivir Spray

Product compatibility

Under recommended conditions of use **Oxivir Spray** detergent disinfectant is suitable for use on most materials commonly encountered. Do not use on marble or other acid sensitive materials.

Microbiological data

Oxivir Spray detergent disinfectant passed EN 1276 at a contact time of 5 minutes at 20°C under dirty conditions and in hard water.

Oxivir Spray detergent disinfectant passed prEN 13727 at 20°C at a contact time of 5 minutes under dirty conditions and in hard water

Oxivir Spray detergent Disinfectant has been tested and found to effective against Human Rhinovirus, Feline Calicivirus (= Norovirus) and Human Rotavirus

Oxivir Spray detergent disinfectant tested according to prEN 14476 showed to be effective against Poliovirus Type 1 and Adenovirus Type 5 at 1% at a contact time of 5 minutes under clean conditions, without interfering substances.
