

Pace®

Floor Cleaning System with Microfiber Pads

Value

- **Simple and Safe**

Fill and place the color-coded chemical bottle on PACE Floor Cleaning System, attach a microfiber pad, pressurize the bottle and clean. Using less water means reducing the slip/fall risk. Spray nozzles ensure chemical goes on floors and not walls and furniture.

- **Efficient**

Clean twice as fast as a mop and bucket, use up to 90% less water and reduce chemical waste up to 81%. Microfiber pads are shaped to make edge and corner cleaning easier.

- **Ergonomic**

PACE Floor Cleaning System is lighter, easier to use and much more maneuverable than a traditional mop and bucket system. Users are always in an upright working position and never have to move and dump heavy mop buckets.

- **Flexible**

Great for damp, wet or disinfection and dry mopping. Meets the needs of day porter, building service and infection control cleaning operations.

Combine the PACE tool, microfiber pads and JohnsonDiversey cleaning products to save time and money.

Applications

Damp mopping, wet mopping, disinfection and dust mopping in a wide variety of customer sectors such as retail, lodging, food service, government, healthcare, education, and BSCs.

Best Uses

- Day porter tool for cleaning busy areas
- Productivity cleaning tool for contract cleaners
- Infection control tool in healthcare locations (medical, dental, veterinarian)
